INVESTMENT STRATEGY

The **Amethyst Arbitrage Fund** employs a multi-strategy arbitrage investment approach focused on event driven, convertible and fixed income opportunities across North America.

The Fund's Objectives are:

- **Returns:** 5 to 10% above 91d CAN T-Bills
- **Volatility:** 5 to 7%, annualized
- **Capital protection and near zero correlation** with traditional asset classes.

MONTHLY COMMENTS

M&A

- Anemic activity during this summer month when only 8 new interesting arbitrage situations arose. Margins continue to be binary, i.e. very tight for transactions with no or very little risk and very wide for others;
- We were hoping Air Canada would increase its offer for Transat by 1 or 2\$... but we'll still be satisfied with the 5\$ premium offered!

CONVERTIBLE SECURITIES

- Our deep-in-the money convert "Puts" were big winners from higher volatility and price appreciation driven by increased demand as investors seek out defensive opportunities;
- Our core convert arbitrage book also benefited from general price appreciation and the strategy continues to contribute a positive carry for the fund.

FIXED INCOME ARBITRAGE

- Performance slightly negative, with insufficient gains on hedging activities to counter losses on credit and yield curve;
- Widening credit spreads, with several lingering concerns (Brexit, Hong Kong, US-China trade, etc.). Most risky assets are under pressure;
- Back to a slightly positive "credit Dv01". Maintaining our position for a steepening of the CAN & US yield curve and long CAN vs US bonds.

ABOUT CRYSTALLINE

Founded in 1998 by Marc Amirault, Crystalline is a privately held asset management firm registered in Canada. Marc created/managed a portfolio of arbitrage strategies during 3½ years while at the Caisse de Dépôt et Placement du Québec, before launching the Company's flagship Amethyst Arbitrage Fund in 1998.

More than 80% of Crystalline's assets originates from pension plans, foundations, endowments, family offices and private corporations. In 20 years, Crystalline has grown to a team of 15.

The information, tools and materials presented in this document are provided to you for information purposes only and do not constitute an offer to sell or a solicitation of an offer to buy any security in any jurisdiction in Canada. The offering of units of the Fund is made pursuant to the Offering Memorandum only to those investors in specific jurisdictions of Canada who meet certain eligibility of minimum purchase requirements. While every effort has been made to provide accurate data, no warranty is made to, and no reliance should be placed on, the fairness, accuracy, completeness or timeliness of the information contained herein. Indicated rates of return include historical annual compounded total returns for the period indicated, including changes in security value and the reinvestment of all distributions and do not take into account income taxes payable that could reduce returns. The fund is not guaranteed; its values may change frequently, and past performance may not be indicative of future results.

From inception to April 2019 the Fund directly held underlying portfolio securities in relation to its investment strategies. In May 2019, as part of a fund reorganization, the Fund began pursuing the same investment strategies primarily through an investment in shares of the Amethyst Arbitrage International Fund (the "International Fund"), which in turn provides exposure to the returns of Amethyst Arbitrage International Master Fund (the "Master Fund"). On June 1st, 2019 the Fund undertook a merger with the Topaz Multi Strategy Fund ("Topaz") in which Topaz unitholders had their units automatically exchanged for an equivalent value of new units in Amethyst and Topaz was terminated. In April 2018 the pre-existing Class F units of the Fund were renamed as Class C.

The Master Fund's strategies include: convertible securities arbitrage; event driven, principally merger arbitrage; and, fixed income arbitrage opportunities and the capital allocated to each strategy varies over time depending on the opportunity set of each. There is no single hedge fund index depicting this strategy mix, and the alternative strategy indices shown are comparable only to certain aspect of the Fund's strategies. Traditional market indices / asset classes are presented so that an investor may conduct additional analysis of their overall portfolio construction and not as a direct comparison to the Fund.
